

Amendments to the Claims:

This listing will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A method comprising:
communicating a file from a client to a server, the file containing
information;
generating an applet based on the information;
communicating the applet from the server to the client;
executing the applet on the client to thereby cause searching for an
additional file; and
communicating the additional file to the server, wherein the file comprises
an INF file.
2. (canceled).
3. (currently amended) The method of claim 2 1 wherein the INF file
comprises a printer INF file.
4. (original) The method of claim 1 wherein the server comprises a printer
server.
5. (original) The method of claim 1 wherein the applet comprises a security
signature.
6. (original) The method of claim 1 wherein the information comprises file
names.
7. (original) The method of claim 1 wherein the information comprises a file
name associated with the additional file.

8. (original) The method of claim 1 wherein the executing includes searching a CD in a CD-ROM drive.

9. (original) The method of claim 1 wherein the executing includes searching a memory associated with a camera.

10. (original) The method of claim 1 wherein the executing includes searching for an image file.

11. (original) The method of claim 1 wherein the executing includes invoking a request for a user's input.

12. (original) A computer-readable medium containing a computer program that is storable in memory and executable by a processor to configure a server to generate the applet of the method of claim 1.

13. (currently amended) A method for configuring a server comprising:
communicating a file from a client to the server, the file containing information;
generating an applet based on the information;
communicating the applet from the server to the client;
executing the applet on the client to thereby cause searching for an additional file, wherein executing includes searching a CD in a CD-ROM drive;
communicating the additional file to the server; and
configuring the server using at least the additional file.

14. (original) The method of claim 13 wherein the file comprises an INF file.

15. (original) The method of claim 14 wherein the INF file comprises a printer INF file.

16. (original) The method of claim 13 wherein the server comprises a printer server.
17. (original) The method of claim 13 wherein the applet comprises a security signature.
18. (original) The method of claim 13 wherein the information comprises file names.
19. (original) The method of claim 13 wherein the information comprises a file name associated with the additional file.
20. (original) The method of claim 13 wherein the executing includes searching a CD in a CD-ROM drive.
21. (currently amended) A method for configuring an Internet Web server comprising:
communicating a file from a client printer to the Web server, the file containing information;
generating an applet based on the information;
communicating the applet from the Web server to the client printer;
executing the applet on the client printer to thereby cause searching by the client printer for an additional file;
communicating the additional file to the Web server; and
configuring the Web server using at least the additional file.
22. (original) The method of claim 21 wherein the additional file comprises an image file.
23. (original) The method of claim 21 wherein the configuring comprises associating the additional file with a Web page.

24. (original) The method of claim 21 wherein the additional file comprises an image file associated with a Web page hosted by the Web server.

25-32. (canceled).

33. (previously presented) A method comprising:
communicating a file from a printer to a server, the file containing information;
generating an applet based on the information;
communicating the applet from the server to the printer;
executing the applet on the printer to thereby cause searching by the printer for an additional file;
communicating the additional file to the server; and
configuring the server using at least the additional file.
